Future Technology for Wastewater Treatment and Water Re-use with MaxFlow

- easy to handle
- less requirement of surrounding technology
- compact shape
- low operating costs
- high quality of effluent (re-usable)
- reduction of fresh water consumption
- reduction of wastewater production
- no need for further disinfection

Wastewater Treatment with MaxFlow Membrane Modules:

- usable for filtration and in membrane bioreactors (MBR)
- high flux rates
- effective wastewater purification
- flexible plant technology
- high resistance of membrane material
